Matara, Sri Lanka
+94 77 100 6107

Motivated Software Engineering undergraduate with strong interests in Data Analysis and Machine Learning. Hands-on experience in Python, SQL, data preprocessing, and exploratory data analysis through academic and personal projects. Familiar with building machine learning models for prediction and classification. Seeking an internship to apply analytical, statistical, and problem-solving skills to real-world data-driven projects while learning industry best practices and gaining practical exposure.

TECHNICAL SKILLS

- Data Analysis & Machine Learning : Data Cleaning & EDA, Pandas, NumPy, Scikit-learn, Machine Learning (Classification & Prediction), Basic Statistics, Excel, Power BI
- Databases : MySQL, PostgreSQL, MS SQL Server, MongoDB, Oracle
- Programming Languages : Python, Java, C#, JavaScript, R
- Web & Mobile Development : HTML, CSS, React.js, Node.js, Spring Boot, Kotlin
- Tools : VS Code, IntelliJ IDEA, Android Studio, Postman, Jupyter Notebook, Git, GitHub, GitHub Actions

SOFT SKILLS

- Teamwork
- Adaptability
- Leadership Time
- Management
- Communication
- Problem Solving
- Analytical Thinking

PROJECTS

Fraud Detection System (<https://github.com/KavishkaKodithuwakku/Fraud-Detection>)

- Built a machine learning model to identify fraudulent transactions
- Performed data preprocessing and feature engineering
- Evaluated model performance using key classification metrics
- Technologies: Python, Scikit-learn, Pandas, Matplotlib

Churn Risk Prediction (https://github.com/KavishkaKodithuwakku/Churn_Risk)

- Developed a predictive analytics solution to identify customers likely to churn
- Applied classification algorithms and feature engineering techniques
- Focused on improving customer retention through data-driven insights
- Technologies: Python, Scikit-learn, NumPy, Matplotlib

Customer Behaviour Analysis Project

(https://github.com/KavishkaKodithuwakku/customer_behaviour_analysis)

- Analyzed customer behavior to identify patterns and trends
- Processed and visualized datasets to support business decisions
- Designed dashboards for insight presentation
- Tools & Technologies: Python (Pandas), Jupyter Notebook, PostgreSQL, Power BI

Dialog Axiata Data Warehouse Analysis

(https://github.com/KavishkaKodithuwakku/Dialog_Axiata_Data_Warehouse_Analysis)

- Analyzed large-scale enterprise datasets to uncover meaningful insights
- Applied ETL processes for data cleaning and transformation
- Developed interactive dashboards for decision-making support
- Tools & Technologies: MYSQL, Power BI, Excel

AutoCare+ Mobile Application

- Developed a full vehicle service management mobile application
- Implemented online bookings, service reminders, and real-time chat
- Integrated Firebase backend services and Google Maps for location features
- Technologies: Kotlin, Firebase, Google Maps API

EDUCATION

Higher National Diploma in Software Engineering National Institute of Business Management	2024 - Present
Diploma in Software Engineering National Institute of Business Management	2023 Aug - 2024 Aug
G.C.E. Advanced Level Examination Technology Stream Rahula College, Matara	2021

ADDITIONAL INFORMATION

- **Certifications:** SLIIT AI/ML Stage 1 Certificate (<https://code.sliit.org/certificates/ndzicvz6lq>)
Google Machine Learning Crash Course
Google Generative AI
Google Cloud
